

Activity 1: Sign In to Microsoft 365 Copilot and Set Your Ground Rules

Duration: 25 minutes **Roles:** You are Daniel Lim, HR Business Partner, working individually

Scenario

Priya Nair, Head of Analytics, needs a Senior Data Analyst by 1 December. Last year a manager pasted a candidate's CV into a free chatbot. Before this hiring round starts, set yourself up in Copilot and agree what must never go into it.

Goal and output

A working Copilot session, a first answer checked against the source, and the team's do-not-paste list.

Tools and data to use

Microsoft 365 Copilot Chat | training account from your trainer | HR-POL-02 in the FutureTech-Careers SharePoint site

Use only the practice files supplied. Never enter real candidate information or company-confidential details into Copilot.

Step by step

Step 1

Go to m365.cloud.microsoft and sign in with the training account shown on the opening slide. Your trainer will tell you the password.

Step 2

Select Copilot in the left menu to open Copilot Chat. Check that you are using your work account (your organisation name appears on screen).

Step 3

Type your first prompt: 'Summarise what Singapore's fair hiring guidelines say an interviewer should not ask candidates about. Keep it to one page.'

Step 4

Read the answer. Highlight one statement you would check on the TAFEP or MOM website before relying on it.

Step 5

Type '/' and choose 'HR-POL-02 Responsible Use of Generative AI in Recruitment', then ask: 'List the personal details this policy says must be removed before using AI.'

Step 6

Write the do-not-paste list you will send to Priya and the panel, and agree three ground rules with your table.

Templates in this folder

- do_not_paste.txt
- first_prompt.txt

If something goes wrong

If Copilot's answer is generic, unfair or not based on your files, keep a copy, add the missing detail to your prompt (goal, context, source or expectations) and try again. If you cannot sign in or an agent does not open, tell your

trainer and continue with the templates in this folder - never use real candidate data instead.

You are done when you have

A working Copilot session, a first answer checked against the source, and the team's do-not-paste list.
