

Activity 5: Build the Interview Kit and Scoring Guide with the Question Designer

Duration: 40 minutes **Roles:** Daniel Lim (HR) and Ravi Kumar (skills questions)

Scenario

Interviews are next Wednesday: Serene Ng in person, Zhi Wei Chua on Teams. Every candidate gets the same core questions and scoring guide, plus two questions tailored to their resume.

Goal and output

An approved interview kit with questions, follow-ups and a 5/3/1 scoring guide, plus two tailored questions for Serene Ng.

Tools and data to use

Question Designer agent | your criteria from Activity 2 | candidate_profile.txt (Serene Ng, de-identified)

Use only the practice files supplied. Never enter real candidate information or company-confidential details into Copilot.

Step by step

Step 1

Open the Question Designer agent. Type: 'Build an interview kit for the Senior Data Analyst role at FutureTech Solutions covering the five competencies in the JD: six questions (behavioural, situational and skills), two neutral follow-ups each, and a scoring guide describing a 5, 3 and 1 answer plus not enough evidence.'

Step 2

Check every question links to one of the five JD competencies - including mentoring, which Priya cares about.

Step 3

Check the mix includes behavioural, situational and skills questions, and that Ravi's skills question is about a real FutureTech situation (for example a revenue figure that doesn't match finance).

Step 4

Check every follow-up is neutral and the scoring guide describes what the candidate says or does, never confidence or personality.

Step 5

Paste candidate_profile.txt and ask: 'Add two questions to explore this candidate's experience against our must-haves, without asking anything personal.' Check nothing asks why she took a career break.

Step 6

Ask: 'Give me one question we must NOT ask for this role, why, and the fair alternative.' Note it for the panel briefing.

Step 7

Plan the timing so all five competencies fit in 45 minutes. Record your edits and approve the kit.

- interview_kit.csv
- candidate_profile.txt

If something goes wrong

If Copilot's answer is generic, unfair or not based on your files, keep a copy, add the missing detail to your prompt (goal, context, source or expectations) and try again. If you cannot sign in or an agent does not open, tell your trainer and continue with the templates in this folder - never use real candidate data instead.

You are done when you have

An approved interview kit with questions, follow-ups and a 5/3/1 scoring guide, plus two tailored questions for Serene Ng.
