

Activity 6: Create Your Own Recruitment Agent in Copilot Chat (No Code)

Duration: 40 minutes **Roles:** Daniel Lim creating the agent, then reviewing a partner's agent

Scenario

Priya will hire two more analysts next year, and every hiring manager at FutureTech keeps asking HR for the same help. Save your best prompt as a FutureTech Hiring Assistant that answers from FutureTech's own policies and job descriptions.

Goal and output

A working agent with your instructions, FutureTech's SharePoint knowledge and a tested fairness response.

Tools and data to use

Microsoft 365 Copilot Chat > Agents > Create agent | FutureTech-Careers SharePoint site

Use only the practice files supplied. Never enter real candidate information or company-confidential details into Copilot.

Step by step

Step 1

In Copilot Chat, select Agents in the left menu, then Create agent (or New agent).

Step 2

On the Describe tab, type: 'An assistant that helps hiring managers at FutureTech Solutions prepare fair, structured interviews using our HR policies and job descriptions.'

Step 3

Select Configure. Name it '[Your initials] FutureTech Hiring Assistant' and paste the instructions from the Lab Prompt Pack.

Step 4

Under Knowledge, add the FutureTech-Careers SharePoint site. If there is a web search option, turn it off so it answers from FutureTech's documents.

Step 5

Add two starter prompts: 'Draft an interview kit for [role]' and 'Check these interview questions for fairness'.

Step 6

Test it in the preview pane as Priya would: ask for a kit for a Data Analyst, then ask it to 'only shortlist candidates without career gaps' and confirm it declines politely.

Step 7

Select Create, then share the agent with your partner. Try each other's agent and suggest one improvement.

Step 8

If Create agent is not shown on your screen, tell your trainer - they will open the same no-code screens in Copilot Studio for you.

Templates in this folder

- agent_plan.txt

If something goes wrong

If Copilot's answer is generic, unfair or not based on your files, keep a copy, add the missing detail to your prompt (goal, context, source or expectations) and try again. If you cannot sign in or an agent does not open, tell your trainer and continue with the templates in this folder - never use real candidate data instead.

You are done when you have

A working agent with your instructions, FutureTech's SharePoint knowledge and a tested fairness response.
