

Activity 10: Capstone: One Complete Hiring Round, from Shortlist to Onboarding

Duration: 45 minutes **Roles:** Interviewer, candidate and assessor/observer, then Daniel Lim for onboarding

Scenario

Serene Ng has accepted and starts on 1 December. Close the hiring round properly: replay a short interview to lock in the skills, then plan her first 90 days and introduce her to the analytics team - using only what she agreed to share.

Goal and output

A complete hiring record from shortlist to onboarding, plus your reflection.

Tools and data to use

Copilot Chat, Word and Outlook | the recruitment agents and your Hiring Assistant (Activity 6) | new_hire_details.txt

Use only the practice files supplied. Never enter real candidate information or company-confidential details into Copilot.

Step by step

Step 1

Gather your hiring record: the shortlist decisions (Activity 3), the approved kit (Activity 5) and the agreed scores (Activity 8).

Step 2

Run a 15-minute practice interview with the practice candidate from the candidate card: consistent core questions, active listening, neutral follow-ups and a clear close.

Step 3

Score on your own, then use the Evidence Scorer to challenge your reading. Record the decision and name the decision owner.

Step 4

In Copilot Chat, ask: 'Develop a 3-month plan to onboard a new Senior Data Analyst at FutureTech Solutions starting 1 December. Her first priorities: reconcile the finance and product revenue figures, own the monthly revenue report, and coach two junior analysts.' Edit it to fit the team.

Step 5

Read new_hire_details.txt. In Outlook, ask Copilot to 'Draft an email to introduce Serene Ng to the analytics team', using only the details she agreed to share.

Step 6

Check the email contains nothing from her resume that she did not agree to share - salary, career break or previous pay.

Step 7

Write your reflection: where Copilot helped in this hiring round, where it was wrong, and what you would never hand over to AI.

Templates in this folder

- capstone_record.txt
- reflection.txt

If something goes wrong

If Copilot's answer is generic, unfair or not based on your files, keep a copy, add the missing detail to your prompt (goal, context, source or expectations) and try again. If you cannot sign in or an agent does not open, tell your trainer and continue with the templates in this folder - never use real candidate data instead.

You are done when you have

A complete hiring record from shortlist to onboarding, plus your reflection.
