

Activity 1: Build the Interview Evidence Contract

Duration: 30 minutes **Roles:** Hiring manager, interviewer, candidate advocate

Scenario

FutureTech needs a Senior Data Analyst and has only a broad job description.

Goal and output

A competency map, interview objective, evidence rules and role boundaries.

Tools and data boundary

Worksheet, approved job description, generative AI assistant

Use only supplied de-identified training data. Do not enter live candidate data, employer-confidential information or production API keys.

Detailed step-by-step

Step 1

Read the job description and highlight outputs, decisions, stakeholders and constraints.

Step 2

Convert five adjectives into observable work behaviours and reject any that cannot be observed.

Step 3

Write one interview objective for each of LO1, LO2 and LO3 evidence needs.

Step 4

Ask GenAI to challenge missing competencies, using only the supplied job text.

Step 5

Approve, revise or reject each suggestion and record the reason.

Step 6

Assign panel roles: chair, question owner, evidence scribe and independent rater.

Evidence files

- job_description.txt
- evidence_contract.csv

Recovery and troubleshooting

If the tool output is missing, generic, biased or ungrounded, preserve the input and output, mark the item as rejected, revise one constraint at a time, and regenerate. If access fails, use the supplied templates and local/demo mode; do not substitute live candidate data.

Completion criterion

A competency map, interview objective, evidence rules and role boundaries.
