

Activity 3: Generate a Structured Interview Pack

Duration: 40 minutes **Roles:** Interviewer and independent quality reviewer

Scenario

Use the HR Interview Question Generator to prepare a consistent Senior Data Analyst interview.

Goal and output

A reviewed interview guide with questions, competency tags, probes and shortlist decisions.

Tools and data boundary

<https://alfredang.github.io/hr-recruitment/> (local mode)

Use only supplied de-identified training data. Do not enter live candidate data, employer-confidential information or production API keys.

Detailed step-by-step

Step 1

Open the HR Interview Question Generator and select Load Sample Data or paste the supplied de-identified profile.

Step 2

Confirm the JD, seniority, salary range and focus areas match the scenario.

Step 3

Generate the pack in local mode; do not use a personal or production API key.

Step 4

Inspect CV Match and list matching evidence, missing evidence and unknown evidence separately.

Step 5

Review Questions across all categories; shortlist only items that trace to the evidence contract.

Step 6

Rewrite one leading, one double-barrelled and one generic question.

Step 7

Export or print the interview guide and annotate the approved sequence.

Evidence files

- candidate_profile.txt
- question_review.csv

Recovery and troubleshooting

If the tool output is missing, generic, biased or ungrounded, preserve the input and output, mark the item as rejected, revise one constraint at a time, and regenerate. If access fails, use the supplied templates and local/demo mode; do not substitute live candidate data.

Completion criterion

A reviewed interview guide with questions, competency tags, probes and shortlist decisions.
