

Activity 4: Create Behavioural and Situational Anchors

Duration: 35 minutes **Roles:** Question designer, candidate, rater

Scenario

The panel needs consistent anchors for stakeholder management and data-quality judgement.

Goal and output

Two behavioural questions, two situational questions, neutral probes and 1/3/5 anchors.

Tools and data boundary

Generative AI assistant, anchor template, course question rules

Use only supplied de-identified training data. Do not enter live candidate data, employer-confidential information or production API keys.

Detailed step-by-step

Step 1

Select one critical incident for each competency from the evidence contract.

Step 2

Draft a behavioural question that requests one specific past event.

Step 3

Draft a situational dilemma with realistic constraints and room for assumptions.

Step 4

Generate candidate responses at limited, adequate and strong evidence levels.

Step 5

Replace style-based descriptors with observable indicators and consequences.

Step 6

Pilot the items with another group and revise ambiguous wording.

Evidence files

- anchor_template.csv

Recovery and troubleshooting

If the tool output is missing, generic, biased or ungrounded, preserve the input and output, mark the item as rejected, revise one constraint at a time, and regenerate. If access fails, use the supplied templates and local/demo mode; do not substitute live candidate data.

Completion criterion

Two behavioural questions, two situational questions, neutral probes and 1/3/5 anchors.
