

Activity 6: Interviewee AI Practice and STAR Upgrade

Duration: 40 minutes **Roles:** Candidate and peer coach

Scenario

Practise for one of six roles in the AI Interview Practice Lab, then improve the weakest answer.

Goal and output

A transcript, 30-mark role rubric, feedback record and before-after STAR answer.

Tools and data boundary

<https://alfredang.github.io/AIInterviewing/> (Demo mode)

Use only supplied de-identified training data. Do not enter live candidate data, employer-confidential information or production API keys.

Detailed step-by-step

Step 1

Open AI Interview Practice Lab and choose a role and realistic difficulty.

Step 2

Read the six rubric criteria before starting; select two evidence stories likely to help.

Step 3

Use Demo mode so no API key or personal data is required.

Step 4

Complete at least six questions, answering with specific personal action and results.

Step 5

Get feedback and identify the lowest-scoring criterion and transcript evidence behind it.

Step 6

Rewrite the weakest answer with concise Situation/Task and detailed Action/Result.

Step 7

Repeat a short session and compare the evidence, not only the score.

Evidence files

- star_upgrade.txt

Recovery and troubleshooting

If the tool output is missing, generic, biased or ungrounded, preserve the input and output, mark the item as rejected, revise one constraint at a time, and regenerate. If access fails, use the supplied templates and local/demo mode; do not substitute live candidate data.

Completion criterion

A transcript, 30-mark role rubric, feedback record and before-after STAR answer.
